

Corrug-Lock is a high precision carbide moulder knives system for millwork manufactures who cut glue lines, hardwoods, and MDF. The carbide knife locks up on a corrugated High Speed Steel backing support plate as it is resharpened. Polished to mirror finish, our micro grain carbide knives offer finer material wood finishes and longer production runs. Knife-Lock knives are compatible with your existing backing plates.

Corrug-Lock knives and backing plates are CNC ground on the latest crush grinders for greater accuracy, precise index locking & closer balance tolerances from knife to knife.

The ultimate carbide moulder knives system for high production millworks who cut glue lines, hardwoods, and MDF. Euro-Lock knives are compatible with your existing backing plates. Advantages over the competition include the use of the super strong micro-grain carbide for longer production runs and our backing plates are the only ones made from high speed steel for greater carbide support.

Euro-Lock knives and backing plates are CNC ground on the latest crush grinders for greater accuracy, precise index locking & closer balance tolerances with polished knife faces to mirror finish to improve the edge sharpness that results in finer material finishes in MDF.
